Professional Summary

Results-driven Full Stack Java Developer with hands-on experience building end-to-end web applications using Spring Boot, RESTful Web Services, Hibernate/JPA, JDBC, and MySQL. Proven ability to manage the complete development lifecycle, from relational database schema design to backend business logic and responsive UI.

Technical Skills

Languages: Java, JavaScript, HTML, CSS
Frameworks & Technologies: Spring Boot 3, Spring MVC, Hibernate/JPA, Java Servlets, JDBC, RESTful Web Services
Build & DevOps Tools: Maven, Git, GitHub, Postman, IntelliJ IDEA, VS Code, Eclipse
Databases: MySQL, PostgreSQL, SQL, Relational Schema Design, CRUD Operations
Core Concepts: OOP, Exception Handling, Collections Framework, MVC Architecture, System Design Basics

Projects

Fitness Tracker Microservices 2026
Java, Spring Boot, Spring Cloud, Kafka, Docker, Keycloak *GitHub*

- Architected a 6-service Spring Boot/Spring Cloud backend, Eureka service discovery, centralized Config Server, and an API Gateway, for tracking fitness activities and AI-generated workout recommendations.
- Secured the gateway with Keycloak OAuth2/PKCE, validating JWTs on every request and auto-provisioning user profiles in PostgreSQL on first login.
- Built an event-driven pipeline with Apache Kafka linking a MongoDB-backed Activity Service to an AI Service generating recommendations via the Gemini API.
- Containerized the full stack with Docker Compose for one-command local deployment.

UPI Offline Mesh Payments 2026
Java, Spring Boot, REST API, AES-256-GCM, RSA-OAEP *GitHub*

- Architected a Spring Boot backend simulating offline UPI-style payments propagated through a Bluetooth-style mesh network without internet connectivity.
- Implemented hybrid encryption (RSA-2048/OAEP, AES-256-GCM) ensuring end-to-end confidentiality and tamper-evidence across untrusted devices.
- Designed an idempotent settlement layer using SHA-256 hashing and atomic operations to prevent double-settlement under concurrent load.
- Built REST API endpoints with replay-attack protection via timestamp validation and per-transaction UUID nonces.

Education

Siddharth College of Art, Science and Commerce 2022 – 2025
BSc in Information Technology, CGPA: 7.3/10.0

New English Junior College 2020 – 2022
Higher Secondary Certificate (HSC) *Class 12: 61% | Class 10: 65%*

Certifications

Essential SQL Skills for Data Beginners
Analytics Vidhya

- SQL queries, data retrieval, filtering, joins, aggregation, and database operations.

JavaScript Bootcamp
LetsUpgrade

- JavaScript fundamentals, DOM manipulation, event handling, and web application development.

ChatGPT as Your AI Assistant
Analytics Vidhya

- Prompt engineering, AI-assisted coding, and developer productivity optimization.
